

STUDENTS

SERIES 500

Policy Title: Wellness Policy

Code No. 507.10

The board promotes healthy students by supporting wellness, good nutrition and regular physical activity as a part of the total learning environment. The school district supports a healthy environment where students learn and participate in positive dietary and lifestyle practices. By facilitating learning through the support and promotion of good nutrition and physical activity, schools contribute to the basic health status of students. Improved health optimizes student performance potential.

The school district provides a comprehensive learning environment for developing and practicing lifelong wellness behaviors. The entire school environment, not just the classroom, shall be aligned with healthy school district goals to positively influence a student's understanding, beliefs and habits as they relate to good nutrition and regular physical activity.

The school district supports and promotes proper dietary habits contributing to students' health status and academic performance. All foods available on school grounds and at school-sponsored activities during the instructional day should meet or exceed the school district nutrition standards. Foods should be served with consideration toward nutritional integrity, variety, appeal, taste, safety and packaging to ensure high-quality meals.

The school district will make every effort to eliminate any social stigma attached to, and prevent the overt identification of, students who are eligible for free and reduced-price meals. Toward this end, the school district may utilize electronic identification and payment systems; provide meals at no charge to all children, regardless of income; promote the availability of meals to all students; and/or use nontraditional methods for serving meals, such as "grab-and-go" or classroom breakfast.

The school district will develop wellness policies in conjunction with the School Improvement Advisory Committee (SIAC). The SIAC is comprised of representatives of the board, parents, teachers, staff, students, administration and public. This committee will develop a plan to implement the local wellness policy and periodically review and update the policy. The committee will designate an individual to monitor implementation and evaluate the implementation of the policy. The committee will report annually to the board and community regarding the content and effectiveness of this policy and recommend updates if needed. The report will include compliance with this policy and describe the progress made in achieving the goals of this policy.

Specific Wellness Goals:

- specific goals for nutrition education – (*see Appendix A*)
- physical activity – (*see Appendix B*)
- other school-based activities that are designed to promote student wellness, (*see Appendix C*)
- Nutrition guidelines for all foods available with the objective of promoting student health and reducing childhood obesity – (*see Appendix D*).

The board will monitor and evaluate this policy by SIAC review – (*see Appendix E*).

WELLNESS POLICY

The nutrition guidelines for all foods available will focus on promoting student health and reducing childhood obesity [*at each school building OR in the school district*];

The board will monitor and evaluate this policy by (*The board needs to insert its monitoring and evaluation process - see Appendix E*).

NUTRITION EDUCATION AND PROMOTION

The school district will provide nutrition education and engage in nutrition promotion that:

- is offered at each grade level as part of a sequential, comprehensive, standards-based program designed to provide students with the knowledge and skills necessary to promote and protect their health;
- is part of not only health education classes, but also classroom instruction in subjects such as math, science, language arts, social sciences and elective subjects;
- includes enjoyable, developmentally appropriate, culturally relevant participatory activities
- promotes fruits, vegetables, whole-grain products, low-fat and fat-free dairy products, healthy food preparation methods and health-enhancing nutrition practices;
- emphasizes caloric balance between food intake and physical activity;
- includes training for teachers and other staff.

PHYSICAL ACTIVITY

Physical Education

The school district will provide physical education that:

- is scheduled on alternating days for secondary; 2 - 35 minute periods per 6 day cycle at the elementary
- is for all students in grades K-12 for the entire school year (this meets or exceeds guidelines set forth by the Healthy Kids Act)
- is taught by a certified physical education teacher;
- includes students with disabilities, students with special health-care needs may be provided alternative educational programming; and,
- engages students in moderate to vigorous activity during at least 50 percent of physical education class time.

Daily Recess

Elementary schools should provide recess for students that:

- is at least 20 minutes a day;
- is preferably outdoors;
- encourages moderate to vigorous physical activity verbally and through the provision of space and equipment; and,
- discourages extended periods (i.e., periods of two or more hours) of inactivity.

When activities, such as mandatory school-wide testing, make it necessary for students to remain indoors for long periods of time, schools should give students periodic breaks during which they are encouraged to stand and be moderately active.

Physical Activity and Punishment

Employees should not use physical activity (e.g., running laps, pushups) or withhold opportunities for physical activity (e.g., recess, physical education) as punishment.

Note - Iowa law now requires elementary students, K-5, to have 30 minutes of physical activity, not physical education, per day. This requirement can be met through a combination of PE, recess, classroom and other activities. Middle and high school students must have at least 120 minutes of physical activity per week. Again this is not just physical education but can be met with a combination of PE, school and non-school sponsored athletics and other activities where the body is exerted. Should a student wish to meet the requirement outside of school, the student and school district must have an agreement detailing the outside activity. A physical activity sample agreement may be found on file in the high school office.

OTHER SCHOOL-BASED ACTIVITIES THAT PROMOTE STUDENT WELLNESS

Integrating Physical Activity into Classroom Settings

For students to receive the nationally recommended amount of daily physical activity and for students to fully embrace regular physical activity as a personal behavior, students need opportunities for physical activity beyond the physical education class. Toward that end, the school district will:

- offer classroom health education that complements physical education by reinforcing the knowledge and self-management skills needed to maintain a physically active lifestyle and to reduce time spent on sedentary activities:
- discourage sedentary activities, such as watching television, playing computer games, etc.;
- provide opportunities for physical activity to be incorporated into other subject lessons; and,
- encourage classroom teachers to provide short physical activity breaks between lessons or classes, as appropriate.

NUTRITION GUIDELINES FOR ALL FOODS AVAILABLE ON CAMPUS

School Meals

Meals served through the National School Lunch and Breakfast Programs will:

- be appealing and attractive to children;
- be served in clean and pleasant settings;
- meet, at a minimum, requirements established by local, state, and federal law;
- offer a variety of fruits and vegetables;
- serve only low-fat (1%) and fat-free milk and nutritionally equivalent non-dairy alternatives (as defined by the USDA); and,
- ensure that half of the served grains are whole grain.

Schools will make an effort to:

- engage students and parents, through taste-tests of new entrees and surveys, in selecting foods, offered through the meal programs in order to identify new, healthful and appealing food choices; and
- share information about the nutritional content of meals with parents and students. (The information could be made available on menus, a web site, on cafeteria menu boards, placards or other point-of-purchase materials.)

Breakfast

To ensure that all children have breakfast, either at home or at school, in order to meet their nutritional needs and enhance their ability to learn, schools will:

- operate the breakfast program, to the extent possible;
- arrange bus schedules and utilize methods to serve breakfasts that encourage participation
- notify parents and students of the availability of the School Breakfast Program, where available; and,
- encourage parents to provide a healthy breakfast for their children through newsletter articles, take-home materials or other means.

Free and Reduced-Priced Meals

The school district will make every effort to eliminate any social stigma attached to, and prevent the overt identification of, students who are eligible for free and reduced-price meals. Toward this end, the school district may:

- utilize electronic identification and payment systems;
- provide alternative meals at no charge to all children, regardless of income; and,
- promote the availability of meals to all students.

Meal Times and Scheduling

The school district:

- should schedule meal periods at appropriate times, e.g., lunch should be scheduled between 11 a.m. and 1 p.m.; should not schedule tutoring, club or organizational meetings or activities during mealtimes, unless students may eat during such activities;
- will provide students access to hand washing or hand sanitizing before they eat meals or snacks; and,
- should take reasonable steps to accommodate the tooth-brushing regimens of students with special oral health needs (e.g., orthodontia or high tooth decay risk).

NUTRITION GUIDELINES FOR ALL FOODS AVAILABLE ON CAMPUS

Qualification of Food Service Staff

Qualified nutrition professionals will administer the meal programs. As part of the school district's responsibility to operate a food service program, the school district will:

- provide continuing professional development for all nutrition professionals; and,
- provide staff development programs that include appropriate certification and/or training programs for child nutrition directors, nutrition managers and cafeteria workers, according to their levels of responsibility.

Sharing of Foods

The school district discourages students from sharing their foods or beverages with one another during meal or snack times, given concerns about allergies and other restrictions on some children's diets.

Foods Sold Outside the Meal (e.g. vending, a la carte, sales)

All foods and beverages sold individually outside the reimbursable meal programs (including those sold through a la carte [snack] lines, vending machines, student stores or fundraising activities) during the school day, or through programs for students after the school day will meet nutrition standards as required by state or federal law. For current state guidelines, click here: http://educateiowa.gov/index.php?option=com_content&view=article&id=1769&catid=838&Itemid=2545

Fundraising Activities

To support children's health and school nutrition-education efforts, school fundraising activities will, in addition to other food items sold, promote and offer healthy choices that meet the above nutrition standards for foods and beverages sold individually. The school district encourages fundraising activities that promote good nutrition and physical activity.

Rewards

The school district will not use foods or beverages, that do not meet the nutrition standards for foods and beverages sold individually, as rewards for academic performance or good behavior, and will not withhold food or beverages (including food served through meals) as a punishment.

Celebrations

Schools should evaluate their celebrations practices that involve food during the school day. The school district will disseminate a list of healthy party ideas to parents and teachers.

School-Sponsored Events

Foods and beverages offered or sold at school-sponsored events (concession stands) outside the school day are not subject to this policy. The school will encourage sponsoring organizations to offer healthy choices in addition to their standard food and beverage offerings.

Food Safety

All foods made available on campus adhere to food safety and security guidelines.

- All foods made available on campus comply with the state and local food safety and sanitation regulations. Hazard Analysis and Critical Control Points (HACCP) plans and guidelines are implemented to prevent food illness in schools.
http://www.fns.usda.gov/tn/Resources/servingsafe_chapter6.pdf
- For the safety and security of the food and facility, access to the food service operations are limited to child nutrition staff and authorized personnel.

PLAN FOR MEASURING IMPLEMENTATION

Monitoring

The superintendent will ensure compliance with established school district-wide nutrition and physical activity wellness policies.

In each school:

- the principal will ensure compliance with those policies in the school and will report on the school's compliance to the superintendent; and,
- food service staff, at the school or school district level, will ensure compliance with nutrition policies within food service areas and will report on this matter to the superintendent or principal.

In the school district:

- the school district will report on the most recent USDA School Meals Initiative (SMI) review findings and any resulting changes. If the school district has not received a SMI review from the state agency within the past five years, the school district will request from the state agency that a SMI review be scheduled as soon as possible;
- the superintendent will develop a summary report every three years on school district-wide compliance with the school district's established nutrition and physical activity wellness policies, based on input from schools within the school district; and,
- the report will be provided to the school board and also distributed to all school wellness committees, parent/teacher organizations, principals and health services personnel in the school district.

Policy Review

To help with the initial development of the school district's wellness policies, each school in the school district will conduct a baseline assessment of the school's existing nutrition and physical activity environments and practices. The results of those school-by-school assessments will be compiled at the school district level to identify and prioritize needs.

Assessments will be repeated every five years to help review policy compliance, assess progress and determine areas in need of improvement. As part of that review, the school district will review the nutrition and physical activity policies and practices and the provision of an environment that supports healthy eating and physical activity. The school district, and individual schools within the school district will, revise the wellness policies and develop work plans to facilitate their implementation.
